"The meaning of my fight is to preserve the specificity of the different professions of artist-authors. We are the source of the works that feed all the links in the chain of the cultural industries of music, live performance and audiovisual such as performers, publishers, producers, OGCs and of course, diffusers.

Let us be proud of ourselves and sure of our creative force, and continue to carry the message of Unac in the interest of its members and beyond all those involved in creation. "
